DETAILED ACTION

The receipt is acknowledged of applicants' IDS, filed 12/06/2004; and terminal disclaimer and amendment, both filed 03/08/2005.

Claims 1-35 are included in the prosecution.

Terminal Disclaimer

1. The terminal disclaimer filed on 03/08/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,471,978; US 6,352,709; US 6,255,277; US 6,174,539; and US 6,087,479 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification lacks description to each of the claimed nitrate that are selected from the group consisting of polypeptide; amino

acids; sugar; oligonucleotide; branched or unbranched, saturated or unsaturated aliphatic hydrocarbon; aromatic hydrocarbon; or heterocyclic compounds. The claims encompass wide classes of compounds that have unrelated structure that all used to inhibit platelets deposition. The specification does not describe method for inhibiting platelets deposition using reasonable number of representative examples of each of claimed classes in order to assure one skilled in the art that the compounds fall within the scope of the claim possess the alleged activity.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. In the present instance, the claims recite the broad range "heterocyclic compounds" and the narrower range "sugar".

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1615

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3, 5, 7-10, 12,14-17, 19, 21-24, 26, 28-31, 33, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Loscalzo.

Loscalzo disclosed that nitroglycerin inhibits platelets aggregation, and this function is potentiated by protein (cysteine).

9. Claims 1-3, 8-10, 15-17, 22-24, and 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by De Caterina et al.

De Caterina et al. disclosed that nitroglycerin inhibits platelets aggregation in the vessels.

10. Claims 1, 2, 4, 8, 9, 11, 15, 16, 18, 22, 23, 25, 29, 30, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Ambrosioni et al.

Ambrosioni et al. disclose the use of ACE inhibitors for treating ischemic heart disease due to their suppressive action on platelets aggregation.

11. Claims 1-3, 5, 6, 8-10, 12, 13, 15-17, 19, 20, 22-24, 26, 27, 29-31, 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Stamler et al.
